PROFILE

I'm Minhaz Ahmed, a second-year Computer Science student at Sahyadri College of Engineering and Management. I'm passionate about technology and software development, with experience in programming languages like Python, Java, C, and JavaScript. My goal is to bridge the gap between theory and practice through internships and real-world projects.

I thrive in collaborative environments and enjoy problem-solving and learning from diverse perspectives. In addition to my technical skills, I have a creative side and enjoy writing stories and poems, with my book *The Black Cipher* published on Wattpad.

SKILLS

Java	Html 5	Express.js
JavaScript	Css 3	Leadership
React.js	Scss	TeamWork
Node.js	Tailwind	Creative Mindset

PROJECTS

FloodGuard HQ
For Srinathon
I participated in SSOSC - Srinivas Students Open Source Community's Srinathon, a national-level hackathon, where I developed a website called FloodGuard. This platform aims to raise flood awareness by providing real-time flood alerts and local detection features.

Roaring Rhythm
Sip Project
"It's a game called Roaring Rhythm, designed for the visually impaired. The game provides a demo beat, and players must use the X and Z keys to match the rhythm. It features multiple tracks that increase in speed and difficulty over time. This innovative idea was selected for the Bangalore Ideathon at Nitte and also secured first place in our class competition."

Brail Convertor
Synergia 24
Our project utilized cutting-edge technologies like OpenCV, MediaPipe, EasyOCR, React, Python, and Firebase. The system seamlessly detects finger movements using MediaPipe, recognizes text through EasyOCR, and converts it into Braille impressions, providing a tactile reading experience for users. It was an enriching journey from ideation to implementation, where we tackled each step of the process.

EDUCATION

Sahyadri College of Engineering and Management
Majors: BTech
Sept,2023-Sept,2027

Sri Chaitanya College
Mar, 2021 - Mar,2023
